AES Growth: A National Priority

The U.S. has an opportunity to on-shore and benefit from the **\$100 billion market** for EV battery manufacturing which currently takes place mostly outside of the U.S. ⁽¹⁾

MAP KEY | NATIONAL BATTERY MANUFACTURING (5)

Mineral & Mining

ex: Nickel, Copper

Battery Production ex: LG, Samsung

Battery Recycling ex: Direct, Reuse, Re-purposing **Top 10 States for Battery Investment** Michigan, Indiana, Ohio, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Kansas, Nevada

The Growing EV Market

By 2040 17% of worldwide EV sales are expected to be in the U.S. ⁽¹⁾

Increasing Demand for Renewable Energy

The percent of total energy generated by renewable sources in the U.S will **increase** by 110% over the next 30 years.⁽³⁾

10 Million Automotive Jobs

5% of all U.S. jobs depend on the automotive sector and **10 Million** U.S. jobs are directly associated with the automobile industry. ⁽¹⁾

Legislation Prioritizing EVs

The Clean Vehicle Tax Credit, part of the Inflation Reduction Act of 2022, subsidizes electric vehicles containing North-American-made batteries, for individuals and fleets.

The threshold for portion of batteries supplied domestically starts at 50% in 2023 and increases 10% each year until it reaches 100% in 2029.⁽⁴⁾

Why West Michigan is Poised for AES Supply Chain Growth

Significant private sector investment in battery manufacturing, an affordable and growing labor pool, and robust state support make the West Michigan region ideal for future AES sector growth.

1. Access to Talent

POPULATION GROWTH: West Michigan is home to two of the fastest-growing counties in Michigan which experienced a 10% in increase in population between 2010-2020. An additional 4% growth is expected in 5 key counties in the region by 2050. ⁽²⁵⁾

SKILLED WORKFORCE: 23% of West Michigan's economy is in manufacturing, giving employers a wide talent base to choose from.⁽⁹⁾

AFFORDABLE LIVING & LABOR: The cost of employing workers is more affordable than other regions due to lower cost of living and average annual wage.⁽⁸⁾

INNOVATIVE EDUCATION

- Ferris State University's new Center for Applied Battery Technology & Production will be a hub of EV technology training.
- Grand Valley State University's Blue Dot Lab will be a center for new technology, innovation, and hands-on, experimental learning.
- Michigan State University's Bioeconomy Institute provides lab space and acts as an accelerator for startups pioneering new biochemistries.
- Grand Rapids Community College is launching a Battery Bootcamp providing degrees/certifications in battery manufacturing and power storage.
- Muskegon Community College offers an alternative and renewable energy degree.

MAP KEY | Battery Manufacturing in West Michigan⁽¹⁷⁾

Professional Services

ex. ESCO Group

Other System Components ex. ADAC, Lear, UFP Packaging

Direct Battery Manufacturing ex. Clarios, LG Energy Solution, Volta Power Systems, Natron Energy Equipment ex. Thermotron

1/3 of U.S Battery Manufacturing takes place in Michigan. ⁽¹⁰⁾

Michigan is ranked 6th in the nation for EV Battery Manufacturing Employment.⁽¹⁰⁾

2. Battery Manufacturing Investment

Since 2022, LG Energy Solution & Gotion have announced \$7 Billion of total investment in expansion of battery manufacturing in Holland and Big Rapids. ^(6, 7)

3. State of Michigan Support

GRANTS & INITIATIVES

- **\$2.2 Billion** from the SOAR Fund continues to help Michigan businesses win large manufacturing projects and create thousands of jobs. ^(11, 12)
- \$125 Million is being invested to electrify school buses in Michigan. ⁽⁶⁾
- **\$25** Million has been invested in the Mobility Futures Initiative to strengthen Michigan's economy and enhance communities. ⁽¹³⁾

WORKFORCE DEVELOPMENT

- Scholarships up to \$10,000 are being offered to 350 top tech students at participating universities by The Michigander EV Scholars program. ⁽¹⁴⁾
- MI is 8th in the nation for higher education R&D and 10th for STEM degree completions. ⁽¹⁵⁾
- Michigan has 479 First Robotics teams the most in the nation. ⁽¹⁶⁾

Reuse & Recycling

West Michigan: Advanced Energy Storage (AES) Ecosystem Report

WEST MICHIGAN'S ROLE in the BATTERY SUPPLY CHAIN

Current viability for Michigan based on economic contributions. Projected viability by 2030

determined by stage-specific outlook.

West Michigan is active in each stage of the advanced energy storage supply chain. In several stages, there is **opportunity for significant growth** in the near future.

STAGE 1 STAGE 2 STAGE 3 STAGE 4 STAGE 5 STAGE 6 Mining **Refining & End Use Cell Assembly Pack Assembly** Recycling Processing Current Activity Level: **Current Activity Level:** Current Activity Level: **Current Activity Level:** Current Activity Level: **Current Activity Level:** LOW LOW MEDIUM MEDIUM MEDIUM LOW **Growth Opportunity:** Growth Opportunity: **Growth Opportunity:** Growth Opportunity: Growth Opportunity: Growth Opportunity: LOW MEDIUM HIGH MEDIUM MEDIUM HIGH As the AES industry expands, Outside of a single nickel As global infrastructure Key cell producers like LG Transportation of batteries The EV market is projected local recycling leaders are mine, the state of **Michigan** for refining and to experience steady **Energy Solution have** is difficult and expensive, so poised to benefit from is not known to possess processing continues to already invested heavily in arowth. There will be there are **significant** recycling as a key raw the raw materials needed expand, Michigan could West Michigan. As the additional opportunities logistical advantages to material source. Success leverage experience in to produce advanced industry grows these to leverage much of the locating cell, pack, and hinges on collaboration with batteries. Significant chemical processing same supply chain for grid manufacturers and others end use assemblies in forward-thinking local and expansion in mining is not industries to attract are expected to increase storage, mobile robotics, close proximity. state governments. anticipated. investment in this area. their investment further. defense, and other AES applications.

Becoming one of the Largest Battery Producers in the Nation

The projected battery capacity of Michigan manufacturing is estimated to **increase by 530% by 2030.** ^(18, 19)

End Use Growth Projections

Grid & Stationary Storage

26.1% growth rate

by 2031⁽²¹⁾

Electric Vehicles

18.17% growth rate

by 2028⁽²⁰⁾

National Defense 0.67% growth rate

by 2028⁽²²⁾

A Future in Recycling 95% of materials in advanced batteries can be recycled into new batteries. ^(23, 24)
